Princeton is recognized nationally and
globally for its world-class financial aid program.
In 2011, Family First published an article, ‘The
Princeton Plan: How one university is making
financial aid possible for Princeton students to
graduate debt free.’ “Princeton’s aid package is
much more than just a financial aid package,
and we care about creating an exceptional
learning community. We are committed to
making Princeton’s education available to
exceptional students from diverse backgrounds to
explore their interests, discover new academic
and extracurricular opportunities, and learn from
one another.”

Princeton’s admission process goes beyond
consideration of grades, test scores, and
extracurricular activities. Princeton looks for
culturally, socially, and intellectually diverse
students who are citizens of the world. Analogous
to Princeton’s philosophy of a ‘gift’ of education
from the University to its students, admission
processes should be designed to achieve the
same outcome: to offer an ‘enrichment’ to
students from diverse backgrounds by
providing them the opportunity to contribute
to the intellectual and cultural life of Princeton.

The Princeton Plan is a comprehensive
financial aid program which provides students
with the opportunity to graduate debt free. Under
the Princeton Plan, a student’s total household
income impacts the size of the financial aid
package.

For the entering Class of 2019, Princeton
covered the full cost of tuition ($43,450) and
room and board ($14,160) for families with
incomes up to $250,000. Further, students with
family income up to $100,000 received 100 percent
of their unmet need. In addition, 60 percent
of our full-need students received at least 75
percent of their need. On average, 95 percent
of our students received some need-based financial
aid. Most aid applicants with family
incomes up to $250,000 received enough
grant assistance to cover the full cost of tuition,
and room and board. Most aid applicants with
family incomes of $100,000 and below were
eligible for some aid.

In the last decade, the amount of our
average need-based grants has increased more
than the amount of tuition increases in the
same period. In other words, Princeton’s financial
aid has grown in line with the cost of
education. For this reason, financial aid at
Princeton is highly selective. A group of high
achieving and intellectually gifted students from
diverse backgrounds to explore their interests,
discover new academic and extracurricular
opportunities, and learn from one another.

Admission to Princeton is highly selective.
Admission decisions are made individually
and are not based on any set formula. Each
year, the size of the class is about 2,500.
Princeton’s admission process requirements
are not meant to screen students, but to
identify highly talented students who fit
within Princeton’s academic environment.
Thus, each student is given the opportunity
to demonstrate his or her capabilities.

For admission, students propose their
applications, which often highlight their
academic accomplishments and personal
qualities. We want to know that special about
them, and we want to see their personal qualities and
gifts to discover what makes them accomplished
in and out of the classroom. We are looking for students who can
demonstrate their potential and be stimulated by
the intellectual and cultural environment of the
Princeton community.

Princeton is a community of learning
sustained by the wide variety of students, faculty
and staff. Princeton’s diversity enhances
teaching and learning in all its forms, including
the cultural, ethnic and economic backgrounds
to explore their interests, discover new academic
and extracurricular opportunities, and learn from
one another.

Princeton is recognized nationally and
globally for its world-class financial aid program.

Princeton University has changed its College Application Common Application so that applicants were required to take two SAT Subject Tests, along with either the SAT or the ACT with Writing. The University has decided to make the two Subject Tests optional to applicants who are Princeton recommended, transferring or entering an eligible program. Applicants not taking Subject Tests will still be able to present Subject Scores to Princeton. Subject Tests will not be penalized if they are not taken. Students who choose not to take the Subject Tests will still be recommended by Princeton for admission. The cost of taking the tests raises no issue, as the Office of Admissions will rely on the applicant’s prior coursework and performance in these courses, strength of recommendations, quality of testing in the essays and other submitted materials.

Changes to Testing Policy

Students who choose not to take the Subject Tests will still be recommended by Princeton for admission. The cost of taking the tests raises no issue, as the Office of Admissions will rely on the applicant’s prior coursework and performance in these courses, strength of recommendations, quality of testing in the essays and other submitted materials.

If students are applying for a program leading to a bachelor of science in engineering, the admission officer recommends, but does not require, that the applicant be accompanied by Subject Tests in either mathematics Level I or II, and either physics or chemistry.

An existing arts complex that will greatly expand the performance, rehearsal and teaching spaces for the arts at Princeton University is scheduled for occupancy in fall 2017.

The ambitious project will be transformative, ensuring that the teaching and performance of the arts at Princeton will continue to flourish. The development will create a new home for Princeton’s Lewis and Clark Theater and the new building associated with the Department of the History. The facilities will support academic programs in theater, dance, visual arts and music.

The buildings will make a new 2,000-square-foot teaching space and 26,000 square feet of classrooms, practice rooms and teaching studios. Across the street from the complex is the McCarter Theatre Center, which includes the Matthews and Berlind Theaters, considered among the leading regional performance venues in the country. The new arts center, along with program expansions in the arts, was made possible, in part, by an unprecedented $55 million gift from Princeton’s Class of 2015, given to the University in 2014. The sourceDonations for the States across the world, including the Kennedy Center in Washington, D.C.

The Tower is a six-story performance and rehearsal space, now the permanent home for the 90-piece Sinfonia, the Concert Jazz Ensemble and the Glee Club, and will provide a permanent home for the 90-year Princeton University Orchestra. The fourth-floor practice rooms and teaching studios are located on the perimeter of the second and third floors. The practice rooms, interconnected among three music studios on the third floor, are equipped with sophisticated recording and acoustic monitoring equipment.

The new arts center, along with program expansions in the arts, was made possible, in part, by an unprecedented $101 million gift from Princeton’s Class of 2015, given to the University in 2014. The source of the gift was from an unprecedented $55 million development that also includes a renovation and addition to a second research center and a permanent home for the 90-piece Sinfonia, the Concert Jazz Ensemble and the Glee Club, and will provide a permanent home for the 90-year Princeton University Orchestra. The fourth-floor practice rooms and teaching studios are located on the perimeter of the second and third floors. Admissions to Princeton is highly selective. Admission decisions are made individually and are not based on any set formula. Each family, for example, is selected as a group of high-achieving and well-rounded gifted students from diverse backgrounds to create an exceptional learning community. As students prepare their applications, they should reflect on their interests, discover new academic and extracurricular passions, and learn from each other.

Princeton is recognized nationally and globally for its world-renowned faculty and programs. For the 2016-17 academic year, 2,986 Princetonians were awarded grants totaling $141 million to support their academic and extracurricular pursuits. Of these, 1,983 were born outside of the United States. Further, students with family income up to $140,000 can receive financial aid in order to cover the full cost of tuition, room, and board. Most aid applicants with family income below $120,000 are eligible for some aid.

In the last decade, the amount of average need-based aid has increased more than the amount of tuition increases in the same period. In other words, Princeton is adding affordable aid to a shrinking number of aid gaps, so as averages, for aid eligible students of the Princeton class of 2017, aid to students with family income under $140,000 was $47,000, an increase of 200%. This is an important change for low- and middle-income families and for students from low-income families and first-generation students, and we remain committed to making the undergraduate education at Princeton as accessible as possible. To support those goals, Princeton uses its substantial resources to ensure that every student has an opportunity to succeed here, regardless of family income.

In 2015-16, the average financial aid grant covered 100 percent of tuition for low-income families receiving need-based aid. The grant is awarded to the Class of 2016, with the average amount of financial aid being $43,450, which includes $14,160 for room and board. An annual average debt was $28,400. Graduates with loans in 2013. Their average debt was $6,600. A total of 2,986 Princetonians were awarded grants totaling $141 million to support their academic and extracurricular pursuits. Of these, 1,983 were born outside of the United States. Further, students with family income up to $140,000 can receive financial aid in order to cover the full cost of tuition, room, and board. Multiple aid applicants with family income below $120,000 are eligible for some aid.

Graduates with loans in 2013. Their average debt was $6,600.
The University has decided to make the SAT Subject Tests optional to applicants. In previous years, students were required to take two SAT Subject Tests, but now, in light of rising testing costs and student concerns about the format of the tests, the Office of Admission will rely on the Common Application as a primary source of test scores. Students who choose not to take the Subject Tests will not be penalized. If students decide to take the tests, they should be taken in the spring of their junior year. In the application process, students are required to submit scores from the three most recent administrations of the SAT I or II, and either physics or chemistry.

The application process is designed to be as accessible as possible for students. From the Common Application, applicants can download the forms and submit them to the Office of Admission. The School Report, which is available now as part of the Common Application, is optional. Applicants who do not complete the Common Application may be asked to submit additional forms and materials. Applicants to Princeton are required to submit scores from the three most recent administrations of the SAT I or II, and either physics or chemistry.

New Arts Center Scheduled for Fall 2017 Occupancy

New arts center scheduled for fall 2017 occupancy

McCarter Theatre Center, which includes the Matthews and Blair Theatres, is considered among the leading regional performance venues in the country. The new arts center, along with program expansions in the arts, will include such facilities as the music building, the Walker Dance-Building, and the three-storied, 3,500 square-foot performance theatre. The new arts center will be a permanent home for the 90-piece Sinfonia, the Concert Jazz Ensemble and the Glee Club, and will provide a permanent home for the 90-piece University Orchestra. The new arts center includes 145,000 square feet of state-of-the-art facilities in the music building,没法看到完整的表格内容。
Princeton University requires applicants to present standardized test scores. Applicants are required to present the SAT or the ACT, and Princeton will accept the scores from both sources. The application process as accessible as possible for your students. Students using the Common Application may be treated equally, from both sources will be equally treated.

**Changes to Testing Policy**

In previous years, Princeton University has changed its testing policy to accommodate students who find the cost of taking and submitting the tests prohibitive. In such instances, Princeton will continue to flourish. The development will create a new home for Princeton Lewis Center for the Arts, a new and building associated with the Department of the arts. The facilities will support academic programs in theater, dance, visual arts and music.

The buildings will anchor a new 22-story, 3,500 square-foot performance and rehearsal space with soaring two-story, 3,500 square-foot performance space. The space’s adjustable acoustics will accommodate such diverse configurations. The space’s adjustable acoustics will accommodate such diverse configurations. The building also contains practice rooms and teaching studios equipped with audio recording and playback systems. The building is equipped with audio recording and playback systems. The building also contains practice rooms and teaching studios. The practice rooms, teaching studios and teaching studios are designed for smaller, more intimate performances. The Princeton University Orchestra, the Princeton Glee Club and the Princeton’s Lewis Center for the Arts will continue to flourish. The ambitious project will be given to the University in 2006. The new arts center, along with program-related renovations, will add 145,000 square feet to Princeton’s arts facilities.

The new arts center, along with program-related renovations, will add 145,000 square feet to Princeton’s arts facilities. The facility includes three buildings — the music building, the Wallace Dance Building and Theater, and a new building. Inside the music building will be a two-story, 3,500-square-foot rehearsal space. Inside the Wallace Dance Building and Theater is a 5,000-square-foot dance theater with seating for 150. Each is designed by architect Steven Holl. In 2012, American Institute of Architects Gold Medalist, who has created landmark arts venues around the world, unveiled the forthcoming expansion of the Kennedy Center in Washington, D.C. Holl’s vision for the arts complex is celebrated as the chamber orchestra, an art gallery, a box office, conference rooms and administrative offices for faculty and staff. The arts and transit complex will be embedded in a park-like setting with extensive landscaped gardens, green space and open views. It is designed by architect Steven Holl, a 2012 American Institute of Architects Gold Medalist, who has created landmark arts venues around the world, including the forthcoming expansion of the Kennedy Center in Washington, D.C. Princeton is recognized nationally and globally for its preeminent financial aid program. Throughout its history, Princeton has made a commitment to ensuring that every admitted student who has financial need has the opportunity to enroll. In 2014-15, Princeton committed over $1 billion in grants to cover the full cost of tuition, room and board, as well as a percentage of additional expenses, for students whose family income was up to $140,000. Furthermore, students with family income up to $250,000 can receive aid to cover the full cost of tuition, room and board. More aid is available with family income between $250,000 and $350,000.

In the last decade, the amount of average need-based grant aid has increased more than the amount of tuition increases in the same period. In other words, Princeton is able to afford these increases to make its education more accessible. For the entering Class of 2019, Princeton expects to award approximately $800 million in financial aid.

For the entering Class of 2019, Princeton covered 100 percent of tuition for those students from a broad range of socioeconomic backgrounds, and 60 percent of our students have family incomes up to $140,000. The average aid package for a student attending to the Princeton class of 2019 includes $200,000 – 250,000.

More information about Princeton’s financial aid program is available in our publication “Making 3 Promises,” which can be found online at Princeton University’s Office of Admission or financialaid/estimator.

The Princeton class of 2019 includes 180 international students from 37 countries and 50 states. Students come from a broad range of cultural, ethnic and economic backgrounds, and 60 percent of our students have family incomes up to $140,000. Princeton is committed to nurturing a diverse student body through its reconciliation program, which aims to increase the number of minority students on campus. As we embark on the new academic year and begin the recruitment process for the entering Class of 2020, we encourage students of all backgrounds to consider Princeton. We are looking for those students who are accomplished in and out of the classroom. We want to know what is accomplished in and out of the classroom. We want to know what is accomplished in and out of the classroom.

FINANCIAL AID

For the entering Class of 2019, Princeton covered 100 percent of tuition and costs for 60 percent of its students. Further, students with family income up to $140,000 can receive aid to cover the full cost of tuition, room and board. We strive to ensure that full-need students receive a grant packages of room, board, and fees at least equal to 57 percent of the estimated need as calculated by the Financial Aid Office. Full-need students whose families have annual incomes up to $140,000 generally receive grants that cover the full cost of tuition, room and board, with a total income of up to $250,000 generally receiving enough assistance to cover full tuition. Of those, 83 percent of our undergraduates receive financial aid. The average aid package for a student attending to the entering Class of 2019 includes $200,000 – 250,000.

More information about Princeton’s financial aid program is available in our publication “Making 3 Promises,” which can be found online at Princeton University’s Office of Admission or www.admission.princeton.edu/financialaid/estimator.

“The Princeton financial aid program is one of the best in the country for low- and middle-income families. Since 2001, it has been possible for Princeton students to graduate debt free.” —Reid Macan, director of undergraduate financial aid

A TRADITION OF EXCELLENCE

Admissions to Princeton is highly selective. Admission decisions are made individually and are not based on any set formula. Each admission decision is based on a careful review of the student’s achievement, character, and personal qualities.

Our students come from a wide variety of backgrounds and are a source of inspiration to each other. They pursue a wide variety of academic and extracurricular pursuits, and learn from each other.

The Princeton class of 2019 includes 180 international students from 37 countries and 50 states. Students come from a broad range of cultural, ethnic and economic backgrounds, and 60 percent of our students have family incomes up to $140,000. Princeton is committed to nurturing a diverse student body through its reconciliation program, which aims to increase the number of minority students on campus. As we embark on the new academic year and begin the recruitment process for the entering Class of 2020, we encourage students of all backgrounds to consider Princeton. We are looking for those students who are accomplished in and out of the classroom. We want to know what is accomplished in and out of the classroom. We want to know what is accomplished in and out of the classroom.
