Princeton University

#PrincetonU

I composed an original chamber opera.

I explored the politics of public health care with my professor.

I analyzed environmental impacts of vertical farming.

Start with curiosity. Study what you love. Make something happen. The process of learning is for you to explore. It will result in something new. Eamon Foley created an original dance-theater piece, "Hero," as his senior thesis. Foley wrote, directed and choreographed the show performed on campus.

Undergraduate Research
at Princeton

Pursue
Your
Passion

I was inspired while reflecting on campus.

I brainstormed ideas for my thesis with friends.

My adviser helped me develop an original research topic.

Explore

All Princeton students complete a substantial research paper or project as a senior.

What will you discover?

Independent work means the chance for you to pursue original research and scholarship under the mentorship of a faculty member. Our academic program will help you grow as a scholar. What will you create?

Imagine

You have a complex topic in philosophy you want to explore. Your roommate is delving into innovative research in molecular biology. A friend majoring in economics wants to try a new approach to a long-standing problem. What are you all doing? Research. Even more than that, research into your senior thesis, where an afternoon with friends at "senior thesis boot camp" is a shared experience in each of your academic journeys.

The Princeton University Library has more than

10 million books.

Passionate about programming, Katherine Ye's senior thesis led to faculty research collaborations, a scientific paper and a conference presentation. She's now at graduate school pursuing a Ph.D. in computer science and has interned at Google Brain.

As a first-generation student from a public school, junior Nicolette D'Angelo didn't know Greek or Latin before coming to Princeton. Today she's a classics major who has studied in Greece and Rome. She plans to pursue a Ph.D. in classics with support from a national scholarship for promising students in the arts and humanities.
