I composed an original chamber opera.  
I explored the politics of public health care with my professor. 
I analyzed environmental impacts of vertical farming.
The Princeton University Library has more than 10 million books. Explore All Princeton students complete a substantial research paper or project as a senior.

Imagine

You have a complex topic in philosophy you want to explore. Your roommate is delving into innovative research in molecular biology. A friend majoring in economics wants to try a new approach to a long-standing problem. What are you all doing? Research. Even more than that, research into your senior thesis, where an afternoon with friends at “senior thesis boot camp” is a shared experience in each of your academic journeys.

Imagine

Research. Even more than that, research into your senior thesis, where an afternoon with friends at “senior thesis boot camp” is a shared experience in each of your academic journeys.

Imagine

What will you discover? Independent work means the chance for you to pursue original research and scholarship under the mentorship of a faculty member. Our academic program will help you grow as a scholar. What will you create?

Imagine

Passionate about programming, Katherine Ye’s senior thesis led to faculty research collaborations, a scientific paper and a conference presentation. She’s now at graduate school pursuing a Ph.D. in computer science and has interned at Google Brain.

Imagine

A first-generation student from a public school junior Nicolette D’Angelo didn’t know Greek or Latin before coming to Princeton. Today she’s a classics major who has studied in Greece and Rome. She plans to pursue a Ph.D. in classics with support from a national scholarship for promising students in the arts and humanities.

Imagine

I was inspired while reflecting on campus.

Imagine

I brainstormed ideas for my thesis with friends.

Imagine

My adviser helped me develop an original research topic.
